Replacement questions for a glitch

29. What unexpected physical detail did John Orlowski discover upon dipping his hand into the stream at the cave entrance?
A) The water temperature was in the high 60s rather than 50 degrees, significantly improving survival odds.
B) The current was flowing outward at a rapid rate, indicating a clear, unobstructed path through the main shaft.
C) The water had completely cleared up near the entrance, allowing high visibility without using underwater lights.
D) The stream level had dropped significantly since the initial collapse, exposing a dry walking passage.

30. As the divers explored the submerged tunnel, what safety procedure did Orlowski and Gerrard maintain to avoid losing their way?
A) They used acoustic sonar pings every three minutes to map the surrounding limestone chamber walls.
B) They placed reflective marker flags along the muddy floor at fifty-foot intervals as they progressed.
C) Orlowski paid out line from a large reel while Gerrard followed closely with his fingers encircling the cord.
D) They anchored heavy steel cables to the rock ceiling at every air pocket they encountered along the route.

31. When the water around Gustavo Badillo suddenly began to glow bright-white and boil, what did he initially assume was happening?
A) He believed the cave ceiling was collapsing under the weight of the surface stream above him.
B) He thought his life had ended and that angels were arriving to take him away from his ordeal.
C) He assumed a subterranean volcanic vent had opened up beneath the floor of the air chamber.
D) He feared his dive light battery was exploding under the high water pressure inside the cave.

32. What was Steve Gerrard's initial assumption when John Orlowski frantically flashed his light underwater inside the second air pocket?
A) He assumed Orlowski's main breathing regulator had jammed on a jagged piece of submerged limestone.
B) He feared that an aggressive wild animal had trapped Orlowski against the upper wall of the passage.
C) He believed Orlowski had lost hold of the primary guide line in the murky, silt-filled water.
D) He figured that Orlowski had located the dead body of the missing diver and was signaling for help.

33. Why does Gustavo Badillo plan to return to the subterranean cave with Steve Gerrard and John Orlowski in the future?
A) To install permanent safety lines and emergency air supply stations for future research divers.
B) To conduct a comprehensive geological mapping survey of the deepest underwater chambers.
C) To retrieve his discarded knife and the lost prayer card to La Virgen del Carmen from the water.
D) To film an instructional documentary on survival techniques for international cave-diving students.
